Revised, October 2001

ABSTRACT. In this paper we present experimental evidence suggesting that observational learning (i.e. learning-by-not-doing but by observing) may outperform learning-by-doing.

JEL Classification: C91, D83.

Keywords: Learning.

*We thank two anonymous referees and an Associate Editor for their useful suggestions. Seminar and conference participants at several institutions provided helpful comments. This paper was completed while Schotter was visiting the Russell Sage Foundation. Their generous hospitality and the support of the C.V. Starr Center are gratefully acknowledged. Meta Brown and Shachar Kariv provided excellent research assistance.
